About COVE: COVE is a collaborative facility for applied innovation in the ocean sector. Their mission is to propel the ocean economy by providing high quality marine infrastructure and a collaborative space in which a community of ocean enterprises can start, grow, and prosper. Supporting ocean technology is the primary goal. This hub of activity will be home to local and global ocean technology businesses, post-secondary institutions, researchers, and marine-based and service businesses that support the ocean sector. COVE is at the centre of Nova Scotia's globally recognized ocean cluster, located in the former Coast Guard facility on Halifax Harbour. The COVE site features extensive marine facilities with two large, deep-water piers, office space, an incubator and space for shops and labs. COVE is a place where innovations will be developed and brought to market. It's a place where start-ups will be inspired and guided. COVE is a working facility for ocean enterprises with access to water and testing facilities.
